

TABLE OF CONTENTS

1	Introduction	1
2	Background - Manifolds	3
2.1	Topological Spaces	4
2.2	Topological Manifolds	4
2.3	Differentiable and Smooth Manifolds	4
2.4	Vector Spaces and Tensors	4
2.5	Tangent Bundles	4
2.6	Tensor Bundles	4
2.7	Lie Groups and Lie Algebras	4
2.8	Principle Bundles	4
2.9	Differential Forms	4
2.10	Orientations	4
2.11	Line Integrals	4
2.12	Integration on Manifolds	4
2.13	Riemannian Metrics	4
2.14	Connections and Parallel Transport	4
2.15	Geodesics, Exponential and Logarithm Maps, Riemannian Distance functions	4
2.16		4
3	Background - Stochastic Differential Equations	5
4	Background - Deep Generative Models	7
4.1	VAEs	7
4.2	Normalising Flows	7
4.3	Diffusion Models	7
5	Generative modelling on Riemannian manifolds.	9
5.1	Measure Theory Probability	9
5.2	Stochastic Processes	9
5.3	Differential Equations	9
5.4	The Itô and Stratonovich Integrals	9
5.5	Itô Diffusions	9
5.6	Langevin Dynamics	9
5.7	Girsanov Theory	9
5.8	Time Reversal Results	9
5.9	Stochastic Calculus on Manifolds	9
6	Generative modelling on constrained domains	11
7	Geometric neural diffusion processes	13
A	Proofs	15
B	Riemannian Score-Based Generative Modelling	17
C	Generative modelling on constrained domains	19

D	Metropolis sampling for generative modelling on constrained domains.	21
E	Diffusion processes on feature fields and (some name tbd). . .	23

1 | INTRODUCTION

2 | BACKGROUND - MANIFOLDS

- 2.1. TOPOLOGICAL SPACES
- 2.2. TOPOLOGICAL MANIFOLDS
- 2.3. DIFFERENTIABLE AND SMOOTH MANIFOLDS
- 2.4. VECTOR SPACES AND TENSORS
- 2.5. TANGENT BUNDLES
- 2.6. TENSOR BUNDLES
- 2.7. LIE GROUPS AND LIE ALGEBRAS
- 2.8. PRINCIPLE BUNDLES
- 2.9. DIFFERENTIAL FORMS
- 2.10. ORIENTATIONS
- 2.11. LINE INTEGRALS
- 2.12. INTEGRATION ON MANIFOLDS
- 2.13. RIEMANNIAN METRICS
- 2.14. CONNECTIONS AND PARALLEL TRANSPORT
- 2.15. GEODESICS, EXPONENTIAL AND
LOGARITHM MAPS, RIEMANNIAN DISTANCE
FUNCTIONS
- 2.16.

3 | BACKGROUND - STOCHASTIC DIFFERENTIAL EQUATIONS

4 | BACKGROUND - DEEP GENERATIVE MODELS

4.1. VAEs

4.2. NORMALISING FLOWS

4.3. DIFFUSION MODELS

5 | GENERATIVE MODELLING ON RIEMANNIAN MANIFOLDS

- 5.1. MEASURE THEORY PROBABILITY
- 5.2. STOCHASTIC PROCESSES
- 5.3. DIFFERENTIAL EQUATIONS
- 5.4. THE ITÔ AND STRATONOVICH INTEGRALS
- 5.5. ITÔ DIFFUSIONS
- 5.6. LANGEVIN DYNAMICS
- 5.7. GIRSANOV THEORY
- 5.8. TIME REVERSAL RESULTS
- 5.9. STOCHASTIC CALCULUS ON MANIFOLDS

6 | GENERATIVE MODELLING ON CONSTRAINED DOMAINS

7 | GEOMETRIC NEURAL DIFFUSION PROCESSES

A | PROOFS

B | RIEMANNIAN SCORE-BASED GENERATIVE MODELLING

C | GENERATIVE MODELLING ON CONSTRAINED DOMAINS

D | METROPOLIS SAMPLING FOR GENERATIVE MODELLING ON CONSTRAINED DOMAINS

E | DIFFUSION PROCESSES ON
FEATURE FIELDS AND (SOME NAME
TBD)
